SchüCad next 2024.2
Installation
[Microsoft® Windows 10, Windows 11]

SchüCad next by download

SchüCad next is provided as a download from our Schüco Digital Server. The installation of the program starts after the new setup file has been downloaded.

You can download the SchüCad next installer from: http://download.schueco.digital/setup/schuecad_downloader.exe

Notes before the installation

1. **AutoCAD® versions 2022 - 2025 already installed?**
   SchüCad next can be installed with AutoCAD, AutoCAD Architecture, Advance Steel and AutoCAD Mechanical versions 2022 to 2025.
   One of these AutoCAD® products with service pack need to be installed on the computer before installing SchüCad next.

2. **Product licensing**
   Licences and activation codes are usually required so that the SchüCad next functions are not only installed, but can also be used.
   Schüco Digital is offering you additional protection for your Schüco software products. You can find more information in the attached explanations. Our Schüco Digital Support staff will be happy to help you with this.

3. **Customising before starting an update installation**
   Please follow the instructions below to save your individual tool palettes and tool bars.

4. **Customising before starting an update installation**
   Please follow the instructions below to save your individual tool palettes and tool bars.

5. **Schüco Architect Library**
   Together with SchüCad next the current version of the Schüco Architect Library will be installed on your computer.
   Access to the Schüco Architect Library now will take place directly from working in SchüCad next (group "system article", tool box "Schüco programs").

Update installation?
Customisation before installation

Before installing the new SchüCad next please follow these instructions to save your individual tool palettes / tool bars and to restore them after you've installed the new SchüCad next:

1. Start your current **SchüCad next** application.
2. Individual tool palettes:
   Export your tool palettes to the corresponding XTP files.
3. Individual tool bars:
   Transfer your tool bars to a individual partial CUI file (**not** to the 'ACAD.cui' and **not** to the 'schuecad+.cui').

Now start the installation of the new SchüCad next.

After having installed SchüCad next you restore your individual settings by:

1. Importing your saved XTP files into your tool palettes
2. Loading your partial CUI file (dialogue "Customize User Interface").

Please note:
The option 'Export profile' is not sufficient!

Installation SchüCad next

AutoCAD® must have been started once prior to starting the SchüCad next installation.

When the download is complete, the installation of SchueCad starts automatically.

- First you select the language for the installation routine.
- In the **Welcome dialog box** you click on *Next>*.

01 Notification of contractual data processing (GDPR)

- Please read the notification of contractual data processing (GDPR) and then confirm by checking the checkbox *"I acknowledge this notice"*.
- Subsequently you click *Next >*.

02. License agreement

- Please read the license agreement and then select the option: *I accept the terms in the license agreement.*
- Now, click *Next>*.

03. Destination folder

   This is how you choose the language version you'd like to be installed.

- Confirm the recommended destination folder into which the program shall be installed.
   If, however, you want to install the program somewhere else then click „*Change...*". In the next dialog you select another existing destination folder or you create a new folder.
- Subsequently you click *Next>*.

04. Start installation

- Click the button *Install* to proceed with the installation.

05. SchüCad next installation

   The installation of SchüCad next will now continue. The end of the installation is signalled when **Installalation Wizard completed** is displayed.

- Finish the installation by clicking *Finish*.

Run and configure SchüCad next   >>>

Run and configure SchüCad next

Creation and update of a SchüCad next desktop shortcut and an AutoCAD® profile named "SchueCad next" are included in the installation.

- Launch SchüCad next. At first the SchüCad next working environment will be configured:

  Select *"AutoCAD"* as the profile template.
  <u>Please note</u>: If one of the AutoCAD Architecture releases is installed on your computer please select *"AutoCAD Architecture 20xx"* as the profile template.

  Select the *"Drafting & Annotations"* template as the working environment and confirm with *OK*.

- Subsequently, you can work with SchüCad next.
  To do this double click e.g the SchüCad next desktop shortcut.
